

FMS Client Spotlight

Leprekon Harvest Foods, Washington
Michael Montemayor, Vice President

“We needed a system that could keep up... FMS handles the rest”

FMS Work Scope:

We enter in our own invoicing and payroll hours and FMS handles the rest. They print our paychecks for us, and handle our accounting needs

Why FMS?

We needed a system that could keep up with our needs. We needed our numbers/information back to us faster and more updated than what we were getting.

How has FMS increased your efficiency and profitability?

Running reports for information we need is very helpful and we get the reports instantly. There is no need to call and request information and have to wait for somebody to get back to us, since we can run the reports ourselves.

“Leprekon is the quintessential independent grocery owner. They are a family owned company and they all work together each day to servetheir customers and grow their business. You often see Joe moving freight from one store to another, Timo working AP invoices until late in the evening, and Michael working in the store each day. It’s in ourDNA to be affiliated with companies such as Leprekon and we appreciate the opportunity to do so.”

Jon Cline, FMS Vice President Client Support

FMS Commitment to Service:

When our long time office assistant quit on us unexpectedly and without a notice, we were lost. Instantly FMS sent Matt Scheelar down to our offices for a couple of days to help get us caught up in what we were behind and helped train us in what we did not know.
